QuickLifeNow

Simple Human Testing Guide

A friendly, easy-to-read guide to test every feature in 10 minutes.

App URL: **http://localhost:5173**

Backend API: **http://localhost:8000**

Database: **Fresh & Clean (Ready for T-001)**

Who You Can Log In As (All passwords are simply: password)

1. ADMINISTRATOR

Ravi Singh

ravi@company.com

Can see everything, manage users & audit logs

2. TEAM MANAGER

Priya Sharma

priya@company.com

Reviews submissions & manages department work

3. TEAM CONTRIBUTOR

Karan Sharma

karan@gmail.com

Does tasks, uploads files & submits work

Let's Test Everything Step by Step

1 Log in with Just 1 Click

1. Open your web browser and go to **http://localhost:5173**.
2. On the login page, you will see 3 colorful cards for Admin, Manager, and Employee.
3. Simply click the **"Login"** button on the **Administrator** card.

> **What to look for:** You are logged in immediately without having to type anything, and the Admin Dashboard opens with your welcome greeting.

2 Change Your 3D Avatar or Upload Your Photo

1. Look at your avatar on the top welcome banner, the top bar, and the bottom of the sidebar.
2. Click the button that says **"Change Avatar"** (or click your picture at the bottom left).
3. Click **"Female"** and hit Save → Your avatar turns into a 3D female avatar everywhere!
4. Click **"Male"** and hit Save → It turns into a 3D male avatar.
5. Want your real face? Click the **"Upload Photo"** tab, pick any picture from your laptop, and save!

> **What to look for:** The photo updates live instantly on the banner, top bar, and sidebar without refreshing the page.

3 Test "Work Alone" Mode (Clean 3-Stage Pipeline & Instant Final Approval)

1. In the left sidebar, click the blue button: **"+ Create New Task"**.
2. Type a task name: "*Review Q4 Budget & Audit Notes*".
3. Under **Handling Method**, pick **"Work Alone"** (I will execute this myself).
4. Click **"Create Task"**.
5. Open the newly created task (code **T-001**).

> **Notice the smart Work-Alone workflow:**
>
> - **Streamlined 3-Stage Stepper:** Displays only `1. Initiated → 2. In Progress → 3. Completed`. The redundant "Evaluation / Under Review" and "Sign-off" steps are hidden because no 3rd-party review is required!
> - **Single Direct Action:** Only the green **"Final Approval & Complete"** button is shown. There is no confusing "Submit for Review" button because you are the worker, reviewer, and final approver.

4 Complete the Work-Alone Task & Watch It Exit "Pending" and "All Tasks"

1. On the task page for **T-001**, click the green **"Final Approval & Complete"** button.
2. Confirm the prompt. The status instantly changes to **"Completed"** (100% progress).
3. Now, click on **"Pending Tasks"** in the sidebar → **T-001 does NOT appear here!**
4. Click on **"All Tasks"** in the sidebar → **T-001 does NOT appear here either!** (All Tasks only shows open active tasks).
5. Now click on **"Completed"** in the sidebar → **T-001 is waiting here** safe and sound!

> **What to look for:** Completed tasks never linger in Pending or All Tasks; they move immediately to the Completed phase where they belong.

5 Test Delegated Mode ("Assign" to Another Employee)

1. Click **"+ Create New Task"**.
2. Name it: "*Design new company homepage*".
3. Under **Handling Method**, pick **"Assign"**.
4. Select **Karan Sharma** as the assignee.
5. Click **"Create Task"**. This creates task **T-002**.

> **What to look for:** Because this task is delegated, it shows the full **5-Stage Pipeline**: `1. Initiated → 2. In Progress → 3. Evaluation → 4. Sign-off → 5. Completed.`

6 Put a Task on Hold and Resume It

1. Click on task **T-002** to open it.
2. Click the orange **"Hold"** button.
3. Type a reason: "*Waiting for client brand guidelines*" and submit.
4. Notice the status turns to an amber/red badge: **"On Hold"**.
5. Now click the green **"Resume"** button → It switches right back to **"In Progress"**!

> **What to look for:** The system remembers why the task was paused and tracks exact hold times in the audit history.

7 Chat, Notes & Attachment Downloads (No 403 Errors!)

1. On the task page, scroll down to **Discussion & Comments**.
2. Type a message: "*Hi Karan, please check the color scheme in section 2.*" and click **Post Comment**.
3. Scroll to **Attachments / Deliverables**, click **"Upload File"**, and pick any file from your computer.
4. Click the blue **"Download"** button next to the file.

> **What to look for:** The comment appears with live timestamp. The file downloads immediately straight to your laptop with zero "403 Forbidden" errors.

8 Multi-Tier Hierarchy Review (Upper Branch / Assigner & Creator Evaluation)

1. **Log in as Employee:** Log in as **Rohit Sharma** (or Karan). Open task **T-002**.
2. **Notice Self-Review Is Blocked:** Click **"Submit for Review"** and submit deliverables. Notice Rohit **does NOT** see a "Review" button, and this task is **NOT** in his Review Queue — because no employee can review their own work!
3. **Ask Assigner via Comments:** If something is missing, notice the blue banner on the Comments tab: "*Need clarification? Post a comment to discuss directly with your assigner.*" Posting a comment notifies his assigner immediately.
4. **Review by Upper Branch / Creator:** Log in as **Ravi Singh** (the assigner / creator). Go to **"Review"** → T-002 is waiting here for Ravi to evaluate!
5. **Assigning Further Gives Review Access:** If Rohit delegates further to another team member (e.g. Aman), Rohit becomes the *Upper Branch* for Aman. When Aman submits, Rohit **WILL** have review access for Aman's sub-branch!

> **What to look for:** Strict organizational hierarchy is enforced: employees cannot review their own submissions, only the upper branch assigner or creator reviews, and delegating down gives review authority over downstream branches!

9 The Admin Super-Power: Work Logs & Task Journey Dossier

1. Log in as **Administrator** (Ravi Singh).
2. Click **"Work Logs"** in the sidebar (under Administration & Audit).
3. You will see a live stream of everything that happened across the company.
4. Try clicking the filter buttons: **Comments**, **Status Changes**, **Attachments**, **Reviews**.
5. On the right side, click on task **T-001** to open its **Complete Task Journey**:
   - **Timeline:** Shows the whole story (Created → Put on Hold → Resumed → Submitted → Returned → Approved).
   - **Communications:** Every message ever sent on this task.
   - **Attachments:** Every file uploaded with one-click download.
   - **Branches:** Who was assigned and when they finished.

> **Security Test:** Log in as Employee (Karan) and try visiting the Work Logs page → The link is hidden, and direct access is blocked with a 403 Forbidden screen to protect company privacy!

10 Managing Departments & Company Users

1. As Administrator, click **"Departments"** in the sidebar.
2. Click **"+ Add Department"**, name it "*Design & Creative*", and save.
3. Try clicking the switch to turn it **Inactive** and back **Active**.
4. Click **"Users"** in the sidebar to see all team members and their roles.

> **What to look for:** Everything is intuitive, fast, and protected by role permissions.

Quick Testing Checklist (Everything to Tick Off)

☐ 1. 1-Click login for Admin, Manager, and Employee

☐ 2. Gender 3D avatar toggle & custom photo upload

☐ 3. Work Alone task with 3-stage pipeline (no review gates)

☐ 4. Direct "Final Approval & Complete" button in Work Alone

☐ 5. Completed tasks exit Pending & All Tasks to Completed archive

☐ 6. Delegated task (Assign mode with 5-stage lifecycle)

☐ 7. Put task On Hold with reason & Resume it

☐ 8. Upload file & download without 403 error

☐ 9. Submit for review & approve workflow for delegated tasks

☐ 10. Admin Work Logs & Complete Task Journey Dossier

All features are tested, verified, and running cleanly on localhost!
